About the Organizer	<p>Wuhan Institute of Posts and Telecommunications Co., LTD. (Fiberhome Technology Group) is one of the two research institutes directly under Ministry of Posts and Telecommunications (predecessor of Ministry of Information Industry) and one of the communication training bases of the Asia-Pacific Telecommunication Union (APT) of the Ministry of Industry and Information Technology. It is one of the first enrollment units authorized by the state to award master's degree in engineering, one of the first national Academy of Excellence Engineers, and a state-approved post-doctoral workstation. In 2018, Wuhan Research Institute of Posts and Telecommunications Co., LTD. (Fiberhome Technology Group) and Research Institute of Telecommunication Science and Technology Co., LTD. (Datang Telecom) were reorganized to form China Information and Communication Technologies Group, with its headquarters located in Wuhan. Our company is an internationally renowned provider of information and communication products and integrated solutions, with business covering more than 100 countries and regions around the world. In 2023, our company achieved a contract amount of US\$1.79 billion in the international market. It is a core enterprise of "Wuhan • China Optic Valley", focusing on six areas: optical communication, mobile communication, optoelectronics and large-scale integrated circuits, data communication, network information security, and intelligent applications. Our company has received attention from national leaders. On April 26, 2018, President Xi Jinping visited our company again, encouraging our employees that core technologies, key technologies, and national heavy equipment must be based on ourselves. On September 14, 2020, Han Zheng, member of the Standing Committee of the Political Bureau of the CPC Central Committee and Vice Premier of the State Council, visited our company, encouraging us to maintain our focus, exert our potential, constantly become stronger, better and bigger, enhance the competitiveness of the international market, and strengthen the strength of Chinese manufacturing.</p>	

	<p>Wuhan Research Institute of Posts and Telecommunications Co., Ltd. is located in Wuhan, Hubei Province, China. Wuhan is an extremely large city in central China, an important ICT、steel and automobile industry base, a science and education base and a comprehensive transportation hub in the country. The Yangtze River, the third longest river in the world, runs through the city and is the largest water, land and air transportation platform in inland China. Its high-speed rail network covers most of China, and it is the only city in central China that can directly fly to the five continents of the world. As the Optical Valley of China, Wuhan is a core city of the Yangtze River Economic Belt and is committed to building an innovation and entrepreneurship center with global influence. Wuhan has more than 80 colleges and universities, high-tech enterprises and talent concentration. Wuhan is speeding up its efforts to build itself into a national central city supported by four functions: national economic center, high-level scientific and technological innovation center, business logistics center and international exchange center.</p> <p>Since 1994, authorized respectively by Ministry of Commerce, Ministry of Information Industry, Ministry of Foreign Affairs and Ministry of Science and Technology, WRI has organized more than 300 foreign-aid training projects, with about 10000 participants from over 100 countries of 5 continents. For more than a decade, WRI has been actively exploring new ways and integrating research into practice. The number of foreign-aid training programs administered by WRI has increased from one to more than 50 per year. WRI has become capable of organizing seminars for officials at department/division level. The seminars last from 10 days, 20 days to 3 months, offered in either English, French, Russian, Arabic, Spanish and Portuguese.</p> <p>Nevertheless, we will continue to make efforts and fully exploit our strengths and experience in terms of communication technologies and foreign-aid training so as to conduct characteristic, high-level and influential training projects, and make greater contribution to the implementation of national economic trade strategies of all countries.</p>
Seminar Content	<p>The main arrangements are as follows:</p> <ol style="list-style-type: none"> 1. Main training courses and content introduction <ul style="list-style-type: none"> - National conditions of China - Global trends in the telecommunications industry and corresponding measures - China's telecommunications industry policies and experiences - Key technologies and applications in 5G mobile communication - Artificial intelligence technology and applications - New technologies and applications in fiber optic communication - Big data and its applications - Smart cities - Telecommunication network planning and optimization - Internet of Things (IoT) technology and applications - Fiber-to-the-Home (FTTH) technology and applications - Wireless Local Area Network (WLAN) technology and applications 2. Site Visit Introduction: <ol style="list-style-type: none"> (1) Visit to China Information Communication Technology Group to gain insights into the

application of ICT technology in telecommunications management and to learn from the practical experiences of Chinese telecom operators and telecommunications management authorities.

(2) Visit to China Telecom Group Limited to understand and learn about the current development status and operational experiences of China's telecommunications industry.

(3) Tour of CICT Mobile to understand the application of communication technology in factory operations and management within the context of big data.

3. Materials to be prepared by trainees

The participant needs to prepare a country report (PPT version). The content of the country report shall include: 1、 Introduction to the basic overview of the participant's home country.

2、 Overview of the ICT industry of the participant's home country.

The presentation should be submitted to the organizer before the end of the seminar.
