**LEADING DIGITALLY CONNECTED SUPPLY CHAINS OF THE FUTURE**

CONTEXT

Covid 19 Pandemic has led to the reset of economic order of the world and has forced organisations to rethink and re-strategize their business continuity plan. In the past two years Logistics and Supply chain Management has dominated every discussion amongst all stakeholders as supplies were disrupted and customer demand became unpredictable. Many emerging technologies found early acceptance during the Pandemic to cater to the changing consumer behaviour and manage order fulfilment processes.

Now, it is time for full deployment and large-scale adoption as, innovative strategies based on digital tools and technologies, will provide the way forward to develop extensive range of solutions for futuristic enterprises.

In this context, supply chain leaders not only need to understand the significance of emerging digital technologies but also lead their implementation in their businesses for short and long-term business success. The aim of this program is to empower managers and professionals, who are working in any vertical of their supply chain, with the cutting-edge knowledge on digital technologies for the new normal, to recalibrate their supply networks, and revaluate their supply chain partnerships.

KEY BENEFITS

- Comprehension of new age global digital supply chain networks and technologies

- Enhanced supply chain efficiency and business performance with the implementation of new-age technologies

- Building resilient and sustainable digital supply chains of the future
